Organisation Overview

Fauna Botanical Cafe & Workspace (Pty) Ltd (Registered name), founded as a startup in 2026 (Hypothetical), Fauna Cafe (Pty) Ltd (Trading name) merges ethical coffee culture with biophilic (nature-inspired) design. Fauna Cafe (Pty) Ltd's mission is to provide the local community with sustainably sourced coffee, organic baked goods, and a dedicated, high-speed digital workspace. The vision is to become the premier local destination where nature, productivity, and ethical consumerism intersect. Remote working professionals requiring reliable infrastructure, university students seeking study spaces, and local artisanal coffee enthusiasts. Study space, and working professionals looking for daily coffee or casual business meetings is the primary target audience.

Website Goals and Objectives

- ### Goals

  To create a digital storefront that drives physical foot traffic, showcases the artisanal menu, and streamlines venue booking and catering inquiries

- ### Key Performance Indicators (KPIs):

  A target of 500 unique monthly visitors, a 20% conversion rate on the online table-booking form, and a minimum of 5 catering inquiries generated per month (Sakyi, 2022).

Current Website Analysis

Fauna Cafe (Pty) Ltd currently operates without a central digital footprint, relying solely on fragmented social media profiles. This absence creates a barrier for corporate clients seeking catering services and remote workers looking to verify workspace amenities (like Wi-Fi speeds and seating availability) prior to visiting.

Website Features and Functionality

The website will consist of five core pages:

- index.html (Hero banner, value proposition, and quick-link navigation.)
- about.html (The origin story, mission, and staff profiles.)
- services.html (A structured HTML table displaying the digital menu and workspace pricing)
- enquiry.html (A comprehensive, validated HTML form for event booking and catering requests.)
- contact.html (Embedded map, operating hours, and direct contact details, booking form)

Design and User Experience (UX)

- ### Aesthetic
    - Warm
    - Earthy
    - Organic
    - Welcoming aesthetic
- ### Colour Scheme
    - Forest green (#2D6A4F) (Figma, n.d.)
    - Warm cream (#F4F1DE)
    - Earth brown (#D4A373).

To provide a sense of serenity, sustainability and productivity, the colour scheme incorporates Forest Green, Warm Cream and Earth brown. These colour choices are rooted in biophilic design principals, utilising nature-inspired aesthetics to enhance focus and well-being (IBPA, n.d.).

- ### Typography
    - Aptos Display for headings,
    - Aptos for body text.

- ## Layout & Wireframes

The layout utilises a modern, card-based grid system optimised for both desktop and mobile viewing. The structure is mapped to semantic HTML5 standards (<header>, <nav>, <main>, <section>, <footer>) to ensure accessibility. Below is the low-fidelity wireframe illustrating the homepage hierarchy, featuring a prominent hero banner to establish the botanical aesthetic, followed by a three-column service feature grid.

Technical Requirements

Domain & Hosting: *faunacafe.co.za* hosted an entry level Linux server

Tech Stack: HTML5, CSS3, and JavaScript. (Qays, 2023)

Timeline and Milestones

- Phase 1: Proposal finalisation and asset sourcing (August 2026).
- Phase 2: HTML layout and CSS styling implementation (September 2026).
- Phase 3: Form validation, cross browser testing, and deployment (October 2026).

Budget

Estimated total budget: ZAR 7,500. (Domain & Hosting: R1,500/year; UI/UX Design & Development: R4,500; Ongoing Maintenance: R1,500/year).
